

# INDEX TO VOL. LXXXIX. (A)

---

- Abney (Sir W. de W.) and Watson (W.) A Case of Abnormal Trichromatic Colour Vision due to a Shift in the Spectrum of the Green Sensation Curve, 232.
- Address of the President (Sir A. Geikie), 451.
- Albe (E. E. F. d'.) See Fournier d'Albe.
- Andrew (J. H.) and Holt (A.) The Thermal Effects produced by Heating and Cooling Palladium in Hydrogen, 170.
- Aston (F. W.) A Simple Form of Micro-Balance for determining the Densities of Small Quantities of Gases, 439.
- Atomic specific heats between the boiling points of liquid nitrogen and hydrogen (Dewar), 158.
- Bacteria, Brownian movement of spores of (Shaxby and Emrys-Roberts), 544.
- Beatty (R. T.) The Energy of Röntgen Rays, 314.
- Beilby (G. T.) Transparence or Translucence of the Surface Film produced in Polishing Metals, 593.
- Benzene series, morphological studies in (Rodd), 292.
- Bragg (W. H.) The Reflection of X-rays by Crystals (II), 246 ; — The Influence of the Constituents of the Crystal on the Form of the Spectrum in the X-ray Spectrometer, 430 ; — The X-ray Spectra given by Crystals of Sulphur and Quartz, 575 ; — and Bragg (W. L.) The Structure of the Diamond, 277.
- Bragg (W. L.) The Structure of some Crystals as indicated by their Diffraction of X-rays, 248 ; — The Analysis of Crystals by the X-ray Spectrometer, 468.
- Brownian movement of spores of bacteria (Shaxby and Emrys-Roberts), 544.
- Burbidge (P. W.) The Fluctuation in the Ionisation due to  $\gamma$ -Rays, 45.
- Carbon monosulphide, band spectrum attributed to (Martin), 127.
- Cathode rays, transmission through matter (Whiddington), 554.
- Clay wares, magnetic materials in (Hopwood), 21.
- Colour-blind observer, luminosity curve of (Watson), 36.
- Colour vision, case of abnormal trichromatic, due to shift of green sensation curve (Abney and Watson), 232.
- Crystal, constituents of, and form of spectrum (Bragg), 430 ; — symmetry and molecular constitution of organic compounds (Wahl), 327.
- Crystals, analysis of, by X-ray spectrometer (Bragg), 468 ; — of sulphur and quartz, X-ray spectra of (Bragg), 575 ; — structure indicated by diffraction of X-rays (Bragg), 248.
- Curtis (W. E.) A New Band Spectrum associated with Helium, 146.
- Cuthbertson (C. and M.) On the Refraction and Dispersion of Gaseous Nitrogen Peroxide, 361.
- Darwin (Sir G. H.) Obituary notice of, i.
- Davidson (G. F.) Experiments on the Flow of Viscous Fluids through Orifices, 91.
- Dewar (Sir J.) Atomic Specific Heats between the Boiling Points of Liquid Nitrogen and Hydrogen. I.—The Mean Atomic Specific Heats at 50° Absolute of the Elements a Periodic Function of the Atomic Weights, 158.
- Diamond, structure of the (Bragg and Bragg), 277.
- Diffraction by particles comparable with wave-length (Keen and Porter), 370.

- Egyptian blue (Laurie, etc.), 418.  
 Elastic hysteresis in steel (Rowett), 528.  
 Electric discharge in rotating silica bulbs (Strutt), 340 ; — and production of neon and helium (Strutt), 499.  
 Electricity, rays of positive (Thomson), 1.  
 Ewen (D.) See Kaye and Ewen.
- Filon (L. N.) On the Temperature Variation of the Photo-elastic Effect in Strained Glass, 587.  
 Flow of viscous fluids through orifices (Davidson), 91.  
 Fournier d'Albe (E. E.) On the Efficiency of Selenium as a Detector of Light, 75.  
 Fowler (A.) New Series of Lines in the Spark Spectrum of Magnesium, 133 ; — and Reynolds (W. H.) Additional Triplets and other Series Lines in the Spectrum of Magnesium, 137.
- Gas densities, micro-balance for (Aston), 439.  
 Geikie (Sir A.) Address as President at Anniversary Meeting, December 1, 1913, 451.  
 Glass, temperature variation of photo-elastic effect in strained (Filon), 587.  
 Green (G.) On Natural Radiation from a Gas, 581.  
 Griffiths (E.) The Variation with Temperature of the Specific Heat of Sodium in the Solid and the Liquid State ; also a Determination of its Latent Heat of Fusion, 561.
- Havelock (T. H.) Ship Resistance: the Wave-making Properties of certain Travelling Pressure Disturbances, 489.  
 Heilbron (I. M.) See Henderson and Heilbron.  
 Helium, new band spectrum associated with (Curtis), 146.  
 Henderson (G. G.) and Heilbron (I. M.) The Selective Absorption of Ketones, 414.  
 Hicks (W. M.) A Critical Study of Spectral Series. Part III.—The Atomic Weight Term and its Import in the Constitution of Spectra, 125.  
 Holt (A.) See Andrew and Holt.  
 Hopkinson (B.) A Method of Measuring the Pressure produced in the Detonation of High Explosives or by the Impact of Bullets, 411.  
 Hopwood (A.) The Magnetic Materials in Clay Wares, 21.  
 Houston (R. A.) The Mathematical Representation of a Light Pulse, 399.
- Ionisation due to  $\gamma$ -rays, fluctuation in (Burbidge), 45 ; — thermal, from carbon (Pring), 344.  
 Ions, positive, from hot metals (Richardson), 507.
- Jevons (W.) Spectroscopic Investigations in Connection with the Active Modification of Nitrogen. III.—Spectra developed by the Tetrachlorides of Silicon and Titanium, 187.  
 Joule-Thomson effect for liquid  $\text{CO}_2$ , inversion point for (Porter), 377.
- Kaye (G. W. C.) and Ewen (D.) The Sublimation of Metals at Low Pressures, 58.  
 Keen (B. A.) and Porter (A. W.) On the Diffraction of Light by Particles Comparable with the Wave-length, 370.  
 Ketones, selective absorption of (Henderson and Heilbron), 414.
- Laurie (A. P.), McLintock (W. F. P.), and Miles (F. D.) Egyptian Blue, 418.  
 Leatham (J. G.) On the Force exerted on a Magnetic Particle by a Varying Electric Field, 31.  
 Light diffraction by particles (Keen and Porter), 370 ; — pulse, mathematical representation of a (Houston), 399.

- Liquid, 2-dimensional motion of frictionless (Morton), 106.  
 Low potential discharge in highest vacua (Strutt), 68.
- MacGregor (J. G.) Obituary notice of, xxvi.  
 McLintock (W. F. P.) See Laurie, McLintock, and Miles.  
 Magnesium, new series of lines in spark spectrum of (Fowler), 133 ; (Fowler and Reynolds), 137.  
 Magnet, temperature coefficient of a Kew collimator (Shakespear), 220.  
 Magnetic insulator in magnetic field, electric effect of rotating (Wilson and Wilson), 99 ;  
     — materials in clay wares (Hopwood), 21 ; — particle, force exerted on, by  
     a varying electric field (Leathem), 31.  
 Magnetism, terrestrial, diurnal variation of (Walker), 379.  
 Mallock (A.) Intermittent vision, 407.  
 Martin (L. C.) A Band Spectrum attributed to Carbon Monosulphide, 127.  
 Merton (T. R.) On a Second Spectrum of Neon, 447.  
 Metals, sublimation at low pressures (Kaye and Ewen), 58 ; — transperance of  
     surface film produced in polishing (Beilby), 593.  
 Micro-balance for gas densities, simple form of (Aston), 439.  
 Miles (F. D.) See Laurie, McLintock, and Miles.  
 Milne (J.) Obituary notice of, xxii.  
 Molecular constitution and crystal symmetry (Wahl), 327.  
 Morton (W. B.) On the Displacements of the Particles and their Paths in some Cases  
     of 2-dimensional Motion of a Frictionless Liquid, 106.
- Neon and helium, production of, and electric discharge (Strutt), 499.  
 Neon, second spectrum of (Merton), 447.  
 Nitrogen peroxide, refraction and dispersion of (Cuthbertson), 361.  
 Nitrogen, spectroscopic investigations with active modification of (Jevons), 187.
- Obituary Notices of Fellows deceased :—  
     Darwin, Sir G. H., i.  
     White, Sir W., xiv.  
     Roberts, S., xx.  
     Milne, J., xxii.  
     MacGregor, J. G., xxvi.
- Palladium in hydrogen, thermal effects by heating and cooling (Andrew and Holt), 170.  
 Phillips (F. S.) Phosphorescence of Mercury Vapour after Removal of the Exciting  
     Light, 39.  
 Phosphorescence of mercury vapour (Phillips), 39.  
 Porter (A. W.) On an Inversion Point for Liquid Carbon Dioxide in Regard to the  
     Joule-Thomson Effect, 377. (See also Keen and Porter.)  
 Pring (J. N.) The Origin of Thermal Ionisation from Carbon, 344.
- Radiation from a gas (Green), 581 ; — origin of black body (Walker), 393.  
 Rayleigh (Lord). On the Passage of Waves through Fine Slits in Thin Opaque Screens,  
     194.  
 Resistance, absolute measurements of, by method based on Lorenz's (Smith), 525.  
 Reynolds (W. H.) See Fowler and Reynolds.  
 Richardson (O. W.) The Positive Ions from Hot Metals, 507.  
 Roberts (S.) Obituary notice of, xx.  
 Rodd (E. H.) Morphological Studies in the Benzene Series. IV.—The Crystalline Form  
     of Sulphonates in Relation to their Molecular Structure, 292.

- Röntgen rays, energy of (Beatty), 314.  
 Rowett (F. E.) Elastic Hysteresis in Steel, 528.
- Selenium, efficiency as detector of light (Fournier d'Albe), 75.  
 Shakespear (G. A.) Experiments on the Temperature Coefficient of a Kew Collimator Magnet, 220.  
 Shaxby (J. H.) and Emrys-Roberts (E.) Studies in Brownian Movement. I.—On the Brownian Movement of the Spores of Bacteria, 544.  
 Ship resistance, wave-making properties, etc. (Havelock), 489.  
 Smith (F. E.) Absolute Measurements of a Resistance by a Method based on that of Lorenz, 525.  
 Sodium, specific heat of, variation with temperature (Griffiths), 561.  
 Spectral series, critical study of. Part III.—The atomic weight term, etc. (Hicks), 125.  
 Spectrum in X-ray spectrometer, constituents of crystal and form of the (Bragg), 430.  
 Steel, elastic hysteresis in (Rowett), 528.  
 Strutt (Hon. R. J.) A Peculiar Form of Low Potential Discharge in the Highest Vacua, 68 ; ——— Note on Electric Discharge Phenomena in Rotating Silica Bulbs, 340 ; ——— Note on the Colour of Zircons and its Radioactive Origin, 405 ; ——— Attempts to observe the Production of Neon or Helium by Electric Discharge, 499.
- Thermal effects by heating and cooling palladium in hydrogen (Andrew and Holt), 170.  
 Thomson (Sir J. J.) Rays of Positive Electricity, 1.  
 Trigonometrical series whose Cesàro summations oscillate (Young), 150.
- Vision, intermittent (Mallock), 407.
- Wahl (W.) The Relation between the Crystal Symmetry of the Simpler Organic Compounds and their Molecular Constitution.—Part II, 327.  
 Walker (G. W.) The Diurnal Variation of Terrestrial Magnetism, 379 ; ——— A Suggestion as to the Origin of Black Body Radiation, 393.  
 Watson (W.) On the Luminosity Curve of a Colour-blind Observer, 36. (See also Abney and Watson.)  
 Wave-making properties of travelling pressure disturbances (Havelock), 489.  
 Waves, passage through fine slits in thin opaque screens (Rayleigh), 194.  
 Whiddington (R.) The Transmission of Cathode Rays through Matter, 554.  
 White (Sir W.) Obituary notice of, xiv.  
 Wilson (M. and H. A.) On the Electric Effect of Rotating a Magnetic Insulator in a Magnetic Field, 99.
- X-rays, reflection of, by crystals (Bragg), 246 ; ——— diffraction (Bragg), 248.  
 X-ray spectra of sulphur and quartz (Bragg), 575 ; ——— spectrometer, analysis of crystals by (Bragg), 468.
- Young (W. H.) On Trigonometrical Series whose Cesàro Partial Summations Oscillate Finitely, 150.
- Zircons, colour of, and its radioactive origin (Strutt), 405.

END OF THE EIGHTY-NINTH VOLUME (SERIES A).
